III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The question whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been and will not be examined in respect of:

- ☐ the entire international application,
☒ claims Nos. 1-10,13-36 and 38-42

because:

- ☐ the said international application, or the said claim Nos. _____ relate to the following subject matter which does not require international preliminary examination (*specify*):

- ☒ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. 1-10,13-36 and 38-42 are so unclear that no meaningful opinion could be formed (*specify*):

In these claims, numerous variables {e.g., R¹, R², R³, R⁴, R⁵, R⁶, etc.}, their voluminous involved meanings, their large number of permutations and combinations and the list of compounds in claims 11-14 and 36-42 make it virtually impossible to determine the full scope for which protection is sought. As presented, the claimed subject matter cannot be regarded as being a concise description for which protection is sought and as such, the claims do not comply with the requirements of PCT Article 6. Thus, it is impossible to carry out a meaningful timely search on same. A search will be provided on the first discernable invention which is the first species listed in claim 11. This species is also found in claims 12 and 37.

- ☐ the claims, or said claims Nos. _____ are so inadequately supported by the description that no meaningful opinion could be formed.
☐ no international search report has been established for said claims Nos. _____

2. A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions:

- ☐ the written form has not been furnished or does not comply with the standard.
☐ the computer readable form has not been furnished or does not comply with the standard.

2. CITATIONS AND EXPLANATIONS

Claims 11, 12 and 37 (all in-part) meet the criteria set out in PCT Article 33(2)-(4), because the prior art {U.S. Pat. 3,743,738} does not teach or fairly suggest the species N-isopropyl-N-phenyl-N'-[2-(1,3-thiazol-4-yl)-1H-benzimidazol-5-yl]urea.
